

# **WHICH COMPUTER IMPRESSED THE PRESS?**

**"... has come pretty close to the original concept of truly portable computing ..."**

**"... it is a truly lightweight machine and also genuinely cheap ..."**

TONY DENNIS, MICRO DECISION, JULY '88.

---

Quoting Paddy Ashdown M.P. "It is a fabulous machine, I find it totally indispensable after using it for just a few months."

"Ashdown ... has found a 'portable' that is what it says it is!"

JUDITH MASSEY, MICRO DECISION, JULY '88.

---

**"I must admit to being a little dubious about it when I first started using it last year. But after more than six months of sterling performance, I am an avowed enthusiast."**

**"... it is everything I have wanted in a portable computer?"**

GEOF WHEELWRIGHT, Mi/PC, JULY '88.

---

"... screen legibility (in our judgement the over-riding factor) is actually better than the NEC Multispeed thanks to the use of the very latest super-twist technology"

"The keyboard ... has a spacious key layout that professional typists will appreciate ... we found ourselves very quickly growing to like it"

"In the value for money evaluation against machines costing up to four times the price, our machine rated top with 100 points, the next nearest was the Tandy 200, (55 points) then the Toshiba 1000, (55 points), the NEC Multispeed scored 35 points"

CHRIS BIDMEAD, WHICH COMPUTER? (PORTABLES SURVEY), FEB '88.

"For the writer wanting to work on trains, boats, planes, beaches, at meetings, in other peoples houses or just in back gardens, it is a tremendously practical and powerful little machine"

COMPUTING WITH THE AMSTRAD PCW, MAY '88.

---

## **"CHAMPION LIGHTWEIGHT"**

**"Of all the lap tops available it is closest to the ideal of a computer so compact and lightweight that it can be carried and used almost anywhere, which combines the advantages of a computer with the portability and instant accessibility of a Filofax."**

**"... it provides a practical, lightweight and affordable answer to the problems of computing away from the office."**

BARRY SMITH, WHICH PC, APRIL '88.

---

"The thing has worked, and worked well. It is also tough."

MARTIN BANKS, PCW, APRIL '88.

---

**"I found it enormously useful. For those making long journeys with time to spare it offers superb flexibility, and in many instances would be worth purchasing for that application alone. The more I use it the more useful I find it to be; and as with any sophisticated system, I am constantly finding new features"**

**"It should be thought of as a truly stand-alone system, capable of holding its own against the (albeit limited) opposition. I thoroughly recommend it"**

SHERIDAN WILLIAMS, BEEBUG, DEC '87.

**"A VERSATILE LAPTOP TO WOO THE BUSINESS USER?"**

**"Overall, it is a very useful business tool and represents excellent value for money when compared to other desktop and laptop computers. The software is of a high standard and very comprehensive."**

MALCOLM COLE, ACCOUNTANCY, JAN '88.

**"It was a joy to use. It would make such an excellent present ..."**

**"It took up very little space, and at a moments notice it could be pulled out, put on any handy surface, and typed into. We did most of our correspondence that way. In fact much of this article was typed on the underground."**

ALAN SOLOMON, LOTUS, FEB '88.

**"The screen is a supertwist LCD model, giving a clarity and sharpness never before seen on a portable computer (and I have used many portables!) ..."**

**"It is ideal for typing on a British Rail Intercity 125 as it is so small and compact, some "PC" compatible computers are far too big, and can never be used on a small and cramped rush hour train."**

A&B COMPUTING, JAN '88.

**"It survived rain, sand, hail, snow and wind in Israel, travelling on a 747, Israeli and Egyptian buses, and even on the back of a camel"**

**"For my purposes, it wins all the portability stakes hands down on weight, size, friendliness, ease of use in the field and robustness."**

CHARLES LEVY, PC BUSINESS WORLD, MARCH '88.

**"... a flexible and truly laptop micro with the potential for great things."**

GEOFF BAINES, WHAT MICRO, DEC '87.

**"SLIM, TRIM AND SOLID"**

**"It really is a nice machine. It is the ideal tool for what it was conceived to do; to let busy people use travelling time to catch up on simple tasks."**

JEREMY TORR, PC BUSINESS WORLD, NOV '87.

**"It provides all the features necessary to keep a busy life running smoothly."**

**"Its real value is versatility, it comes with software for almost every situation."**

**"In the two weeks I've been using it I've become addicted. Time which otherwise would be wasted is now used for writing letters and articles, and the interactive diary makes its paper equivalent obsolete. My only real problem is finding a way to avoid returning the machine to the PR company!"**

JOHN MINSON, TIME OUT, NOV '87.

**"... another undoubted winner?"**

**"It is a real proper computer ..."**

**"... possessed of the best keyboard I've yet encountered?"**

**"What you get with it is just about everything most people ever need from a computer."**

**"... more than adequate for most businessmen's needs ..."**

**"I propose to buy one out of taxed income!"**

MICHAEL BYWATER, PUNCH.
